# Limpeza y mantenimiento del acero inoxidable

## *Stainless steel maintenance and cleaning*

El acero inoxidable es un acero bajo en carbono y con un mínimo de contenido del 10% de cromo. El cromo da al acero propiedades únicas en cuanto a anti-corrosión frente a la mayoría de productos químicos.

A pesar de ser muy resistente a la corrosión, el mantenimiento incorrecto del acero inoxidable puede oxidarlo o decolorarlo. Es muy importante una limpieza regular con jabón no agresivo y agua, mediante el uso de un paño de algodón.

**Los productos que acabarán por corroer al acero inoxidable son los siguientes:**

- Las lejías y productos de limpieza a base de hipoclorito.
- Ácido muriático.
- Jabones concentrados.
- Agua con contenido alto en hierro.
- Contacto con materiales de hierro.
- Ácidos, desinfectantes concentrados, cloro y álcalis fuertes (sosa cáustica).

Muchas decoloraciones del acero inoxidable pueden ser eliminadas mediante el uso de jabones no agresivos o productos especiales para la limpieza del acero inoxidable. Sin embargo, el mantenimiento correcto del acero inoxidable garantiza la apariencia original.

*Stainless steel is a low carbon steel that contains at least 10% chromium. Chromium gives the steel its unique anti-corrosion properties.*

*Despite its corrosion resistance, the incorrect maintenance of stainless steel can cause corrosion and discoloration. A frequent cleaning with mild soap and water with a cotton cloth is required.*

*The following is a list of products that can eventually cause corrosion or discoloration of stainless steel:*

- *Chloride containing cleansers: This includes all products which contain a certain amount of bleach.*
- *Muriatic acid.*
- *Concentrated soap residue.*
- *Water with high iron content.*
- *Contact with iron materials.*
- *Acids, concentrated disinfectants, chlorine and strong alkaline products.*

*Most discolorations can be removed by using mild soap or products specially designed for stainless steel cleaning. However, the correct maintenance and cleaning, guarantees the original appearance indefinitely.*
